

AJAY KALAKOTA

FULL STACK DEVELOPER

Khammam, Telangana, India | +91 7337522120 | ajaykalakoti34@gmail.com
LinkedIn: [linkedin.com/in/ajay-kalakota-b8051227a](https://www.linkedin.com/in/ajay-kalakota-b8051227a) | GitHub: github.com/ajaykalakoti

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of professional experience designing and developing web applications using Angular, React.js, Next.js, Node.js, Express.js, MySQL and PostgreSQL. Currently build and maintain Telinfy, an enterprise CPaaS and omnichannel messaging platform serving 500+ business clients and processing 10M+ messages per month. Experienced in RESTful API development, third-party API integration, webhooks, responsive front-end development, relational databases and Agile / Scrum delivery, owning features end to end across the full software development life cycle (SDLC).

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Front-End Development: Angular, React.js, Next.js, Responsive Web Design, HTML, CSS, DOM Manipulation, Cross-Browser Compatibility

Back-End Development: Node.js, Express.js, RESTful APIs, REST API Development, Webhooks, JSON, Authentication and Authorization, Server-Side Development

Message Queues: RabbitMQ (RMQ), Asynchronous Message Processing, Queue-Based Architecture

Databases: MySQL, PostgreSQL, SQL Queries, Relational Database Design, CRUD Operations

APIs and Platforms: WhatsApp Business API, RCS (JBM), SMS Gateway Integration, CPaaS, Third-Party API Integration

Tools and Version Control: Git, GitHub, RabbitMQ, PuTTY (SSH), WinSCP (SFTP), Postman, VS Code, npm, Linux Server Access, Debugging

Methodologies: Agile, Scrum, SDLC, Software Development Life Cycle, Full Stack Development, Object-Oriented Programming

WORK EXPERIENCE

Full Stack Developer

12/2024 - Present

GreenAds Global Private Limited (Telinfy Messaging Platform), India

- Develop and maintain **Telinfy**, an omnichannel CPaaS platform unifying WhatsApp Business API, RCS, SMS and Voice messaging for **500+ business clients** and processing **10M+ messages per month**.
- Design and develop **RESTful APIs using Node.js and Express.js** with MySQL and PostgreSQL, powering campaign execution, message routing, contact management and analytics.
- Build responsive, client-facing web dashboards using **Angular, React.js and Next.js** for campaign creation, contact and template management, and delivery reporting.
- Develop **unified, follow-up and fallback campaign modules** that allow clients to launch multi-channel campaigns from a single workflow and automatically retry delivery on an alternate channel when the primary channel fails.
- Work with **RabbitMQ (RMQ) message queues** for asynchronous, high-throughput message processing across channels.
- Implement **webhook handling** for delivery receipts and inbound messages, keeping message status and conversation state synchronised in real time.
- Access and troubleshoot Linux application servers using **PuTTY (SSH) and WinSCP (SFTP)** to review logs and diagnose production issues, and manage source code and version control through Git and GitHub.
- Integrate third-party APIs including the **Meta WhatsApp Business API and JBM for RCS**, and debug production delivery issues to improve campaign reliability.
- Contribute to the **agent inbox** for two-way customer conversations across WhatsApp, RCS and SMS, and to the **AI-powered chatbot module** that automates customer replies and lead qualification.
- Collaborate within a **5-engineer Agile team**, delivering features end to end across front-end, back-end and database layers, and participating in code reviews and requirement discussions.

Web Development Intern

2024

Navodita Infotech, India

- Designed and deployed a responsive developer portfolio web application using HTML, CSS and JavaScript, applying responsive web design principles and modern front-end practices. (github.com/ajaykalakoti/Portfolio)

PROJECTS

Securing Data with Blockchain and AI: Developed a data-security solution combining blockchain integrity verification with AI anomaly detection to protect records from tampering. Technologies: Python, Blockchain, Machine Learning.

Vijaya Educational App (Live on Google Play): Contributed to an Android application connecting students and faculty for college announcements and two-way communication. Link: play.google.com/store/apps/details?id=co.diy7.diion

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering (Artificial Intelligence and Machine Learning)

Vijaya Engineering College (JNTU Hyderabad), Khammam, Telangana, India

Graduated: 2024 | CGPA: 7.96/10 | Languages: English, Hindi, Telugu

CERTIFICATIONS

- Python Full Stack Developer Foundation - BitLabs
- Machine Learning with Python - E&ICT Academy, IIT Kanpur
